Decorate Your Shelves Like a Pro

1. Place Larger Objects First

Start with clear shelves and then take any larger pieces and place them across the shelves, making sure they're balanced across the height and width of the space. Allow room for smaller items around it.

2. Bring The Outdoors In

Neutral schemes will benefit from a pop of greenery. Fill a couple of stoneware planters and think about placement. They need to be apart from each other but bare in mind natural light that they may need.

3. Create Stylish Stacks

Instead of standing books, place them down and group similar sized books together with smallest on the top. You can then use these as platforms to display smaller items on top.

4. Be Versatile with Vases

Clear vases are perfect for displaying a collection of sea shells, stones or pebbles. Rustic items against the smooth and refined will add interest and depth. You could also use a candle in the vase as decorative pieces.

5. Arrange a Scent-Scape

Consider this step the final touch. Use a base such as a wooden board and group similar items together such as a diffuser and candle. Remember your shelving displays are never 'finished', you can switch it up anytime!
