5 steps to Doorscape!

1. Pumpkins, Obviously...

It wouldn't be autumn without pumpkins. While fresh ones from pumpkin farms will stay in perfect condition for around a month (if they haven't been pierced), decorative pumpkins last even longer — and can be reused every year. Tip- Opt for more than 1 and different types to mix it up a bit.

2. Lighting

Elevate your front door with glowing lights and lanterns. To create the best look, I suggest grouping in sets of 3 for a more cohesive look. For a more striking look, consider traditional tones, such as golds or silvers, as they will complement the glorious blazing colours of autumn

3. Door Wreath

Wreaths provide a focal point and they will transform your outdoor space in an instant, and, best of all, can be reused year after year.

4. Doormat

Welcome guests into your home this autumn with a seasonal doormat. As well as creating a wonderful entrance, it's a great way to limit dirt being dragged inside.

5. Composition

Focus on framing the space not filling it. Gather all your autumnal bits and aim to create a functional space. Blend colours, textures and lighting together to create a seamless yet beautiful seasonal space to enjoy.
